

**Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims**

1. (canceled)
2. (currently amended) A composition comprising:  
a combination of ethylcellulose and amphiphilic triblock copolymer surfactant, wherein the amphiphilic triblock copolymer surfactant consists of a triblock copolymer of ethylene oxide-propylene oxide-ethylene oxide and the composition in dry coated form includes combination of ethylcellulose and amphiphilic triblock copolymer surfactant includes 40 wt% to 99.5 wt% ethyl cellulose and 0.5 wt% to 60 wt% of the amphiphilic triblock copolymer surfactant; and  
a single organic solvent, wherein the ethyl cellulose and the amphiphilic triblock polymer surfactant are each dissolved in the single organic solvent.
3. (canceled)
4. (canceled)
5. (previously presented) The composition according to claim 2, wherein the molecular weight of the amphiphilic triblock copolymer surfactant is 2,200 to 15,000.
6. (previously presented) The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 3 to 20 moles of ethylene oxide.
7. (previously presented) The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 45 to 80 moles of ethylene oxide.

8. (previously presented) The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 50 to 110 moles of ethylene oxide.

 9. (previously presented) The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 70 to 130 moles of ethylene oxide.

10. (previously presented) The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 110 to 170 moles of ethylene oxide.

11. (canceled)
